

End of lifespan - Looking Ahead!

Brussels, 28/09/17

The e-Skills Match demo platform looks ahead to the ever changing demands in today's job market and aims to evolve and mark its presence in the ICT sector even as it completes its successful cycle under the European Commission grant agreement no. ECOKT2014-7 (30-CE-0726730/00-60).

The project which kicked off in September of 2015 was implemented by a consortium comprised of the following partners: Stockholm University (*Sweden*) as the project coordinator, Fondazione Politecnico di Milano (*Italy*), Universidad de Alcalá (*Spain*), Adfor SpA (*Italy*) and Government To You (*Belgium*).

During the 24 month lifespan, the e-Skills Match demo platform was created and is now available to help users evaluate ICT skills and plan on the next step that will empower their presence in the ICT sector.

Thank you for being with us during these past two years. Our aim is to continue to serve the needs of ICT professionals through the e-Skills Match platform for more years to come.

The [e-Skills Match demo platform](#) will remain active so we invite you to test it!
