

Map your Journey to a New Career

Brussels, 19/07/2017

We are thrilled to announce that the e-Skills Match demo platform is available to help users evaluate ICT skills and plan on the next step that will empower their presence in the ICT sector!

You will no longer have to shift from one service to another in order to seek the best career path. We have developed a self-assessment system (in the form of a multiple-question questionnaire) that measures the ICT skills of the user, according to the European e-CF and ESCO frameworks.

Test and find out!

We help you to discover the tailored-made courses through MOOCs and OERs that will give you the cutting edge skills for your next career step.

We help you to create and enrich your personal e-Portfolio.

With the completion of this process, the system identifies skills, suggests online courses and employers will find you based on your competencies.

We invite you to test and evaluate the e-Skills Match platform.
